CONSULTATION REQUEST (with Dr. Dodds)	Fax form and All Medical Information and/or previous lab testing results to 714-891-2123.	\$ 150.00

SUGGESTIONS FOR SENDING SAMPLES:

For Sending Serum Samples ONLY (For Thyroid testing, Titters and Heartworm testing). You can use USPS priority 2-day. Put the serum tubes in a zip lock baggie & then wrap with bubble wrap or padded paper and put in a small sturdy box with the filled out Test Request Form. **NO ICE PACK IS REQUIRED.** Serum samples are viable for about 14 days at room temp (except for during extreme hot weather conditions)

Whole Blood Samples – Lavender Top Tubes Whole Blood Samples (lavender top tubes) **REQUIRE** an ice pack and should be sent by overnight courier (FedEx or UPS), or can be sent USPS Priority Mail (2-day) with an ice pack. This would include any tests or profiles that contain CBC testing, which requires a lavender top tube.
